Sponsor Highlights

Season Recap

Team 107 had a spectacular 2022 Season. We competed at the West Michigan District in March. We were semi-finalists and winners of the Innovation in Control Award! In April, we competed at the Jackson District. We won the autonomous award, and we were the event **winners!** We qualified for the state championship at Saginaw Valley State University. At State, we ranked 4th, and won the State Championship Excellence in Engineering Award! Our driver, James Oosterhouse, also won the Dean's List Award at the State Championship, for outstanding student leadership. Because of our team's success, we qualified for the world championship in Houston, Texas. Team 107 took flight, and made the long trip to the Lone Star State. We had an awesome weekend and made it all the way to the semi-finals! It was an incredible season filled with learning, victory, and lots of fun. Thank you for your support!

Chicago Title

Each month we will highlight a few sponsors as a way to show our gratitude!

Our Summer

Currently, the team is working on preparations for the next season. We are working on our community outreach and team marketing to get our name out to more people. The team has also started fundraising for the next season, as it will be more expensive than ever. Our team hopes to return to Texas for the 2023 World Championship! We also have begun our summer design project in which we are refining our design process for future seasons!

Save the Date!

Join us on Saturday, October 22, for the annual West Michigan Robotics Invitational! This fun, one-day event takes place at Zeeland East High School, and we would love to see you there! For more information, please visit westmifirst.org/wmri
